KEEP YOUR FURNITURE BEAUTIFUL

CLEAN AND CARE INSTRUCTION

This guide will instruct you on the best ways to care of your Mapswonders pieces so that you can maxime their life. The location of your furniture can affect its longevity. Placing furniture where it can touch external walls can create moisture build-up, and placing it too close to radiators, heaters or wood fires can increase the risk of schorcing damage or discoloration. Sharp objects such buckles, rings and even the claws of your pets can scratch or break the furniture. Vacuum your upholstered pieces on low suction level and protect the furniture from direct sunlight.

STEE

Stainless steel does not stain, corrode or rust as easily as ordinary steel however, it is not stain or rust proof. In extreme coastal locations or if the steel is regularly subjected to water or high humidity, brown discoloration can appear on the surface of products. Brown discoloration staining can normally be removed with mild abrasive cleaner and warm soapy water.

BRASS COPPER NICKEL IRON BRONZE

Keep metal dry to prevent tarnishing which can dull or destroy the surface. Avoid using abrasive cleaners that can scratch and dull metal surfaces. Rub the metal with straight back-and-forth motions, rather than in circles, to help maintain a uniform appearance. Apply metal cleaner with a clean, soft, lint-free cloth and prevent undiluted liquid dish-washing detergents from coming into direct contact with metal as it can damage the finish. Iron and Bronze pieces just need an occasional wax. However, in high traffic areas or areas that are exposed to abnormal interior humidity, Iron may require more frequent maintenance.

STONE

Marble, Travertine, Granite, Limestone, and Cement Stone are very delicate and must be cleaned with neutral and gentle cleaners. Acids, even the mild acid in vinegar, will dissolve the finish and permanently etch the surface. Some stones are very porous and therefore, may absorb liquid spills. If liquid spills do occur, wipe it dry as soon as possible by blotting dry with a clean cloth. The best method for cleaning Stone is to wet a clean cloth with lukewarm water to wipe the surface, and to remove any marks.

LEATHER

Vacuum or wipe with a cloth regularly to remove dust. Clean with a damp cloth or with a soft leather cleaner. Bloi immediately with a clean and dry cloth. Do not rub or use abrasive or corrosive cleaners as they will damage the leather.

FABRIC

Do not use water - Clean only with a water-free dry cleaning solvent. Pretest a small and inconspicuous area before proceeding. To prevent overall soiling, frequent vacuuming or light brushing with a non-metallic soft bristle brush is recommended. Mapswonders highly recommends having your upholstery professionally cleaned

WOOD

Mapswonders collections often have lacquered surfaces and can tolerate the heat from coffee cups and dinner plates, however they cannot tolerate greater temperatures from dishes heated on the stove-top or microwave ovens. The lacquer is also water resistant, however cannot tolerate excessive quantities of liquid. Dry any spills immediately and polish the surface, otherwise liquid may seep through the lacquer and cause irreparable damages. Mapswonders solid furniture is a natural product and may expand and contract due to varying temperature conditions. Remove ordinary household dust with a soft and clean cloth.
